

# OER and a taste of the leading edge of Personalisation Supporting Accessibility

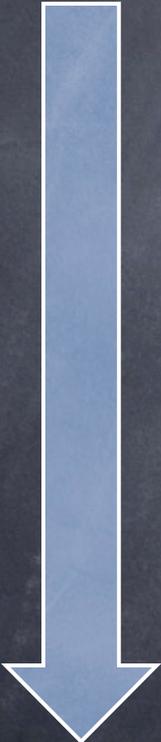

Andy Heath, Axelrod Access for All  
26<sup>th</sup> March 2013

# Needs and Preferences Anywhere, Anywhen, Anyhow (including Learning)

- Watch <http://gpil.net>
- But not right now

# Accessibility is A Relationship

Some Approaches to managing

- 
- Medical Model
    - Human argument
    - Exponential Complexity, Costs
  - One/Many sizes fit all (“This works for you”)
    - Many is better than one but sub-optimal
  - Individualisation
    - Adaptations optimal for each user, sometimes managed with explicit machine-readable needs and preferences

Works  
Better

# The Requirement

- Deliver to the user UI, Content, Form best matched to what that user needs or prefers in that context/environment
- System: for diverse users in diverse contexts
- User: what is useable to that user in that context

# Typical Use Cases

- (Teenager ?) texting walking down the street. The sun comes out.
- Watching a course video and the environment becomes noisy – device notices and switches on captions
- Inverse video delivered over the web
- Content rendered in audio while driving

Diverse users in diverse contexts

# The User Side – Explicit Needs and Preferences ..

There are many sets. E.g. working on in W3C:IndieUI (User Context integrated in Mobile Devices)

- textualForAuditory: true, false, captions, transcript, transcript-simultaneous
- textualForVisual: true, false, alternativeText, longDescription
- textualForTactile: true, false
- visualForAuditory: true, false, signLanguage
- visualForTextual: true, false
- auditoryForVisual: true, false, audioDescription
- auditoryForTactile: true, false
- auditoryForTextual: true, false

## .. Explicit Needs and Preferences

- .....
- tactileForAuditory:true, false
- tactileForVisual:true, false
- tactileForTextual:true, false
- languageOfAdaptation:
- hazard: flashing, flashingStrict, motionSimulation, sound
- ATInteroperable: true, false
- simplePresentation:true, false

# The Content Side

- Look at
  - <http://www.allymetadata.org/>
  - <https://wiki.benetech.org/display/allymetadata/Proposed+Properties>
  - <http://accesstonsdl.org/catalog/>
  - <http://www.teachersdomain.org/>

# Standards/Groups (techie stuff)

- GPII – <http://gpii.net>
- W3C:IndieUI
  - Independent User Interface
    - <http://www.w3.org/WAI/IndieUI/>
- ISO/IEC JTC1 SC36 Access for All – needs/preference terms registry under construction, working with GPII
- IMS Access for All v 3.0
  - <http://www.imsglobal.org/accessibility/>
- Many other groups, see my web site

# Me

- Andy Heath
- axelafa.com, soon to be diversitynet.co.uk
  - [andyheath@axelrod.plus.com](mailto:andyheath@axelrod.plus.com)
  - [andyheath@diversitynet.co.uk](mailto:andyheath@diversitynet.co.uk)
    - diversitynet is pre-natal
- Independent consultant, 14 years active in international technical standards supporting accessibility
- Editor several relevant ISO standards, invited contributor to many relevant groups
